

# Specialty Surgical Center

Specialty Surgical Center is a state-of-the-art AMBULATORY SURGICAL CENTER (ASC) designed to provide the highest quality patient care in a comfortable environment.

## WHAT IS AN ASC?

Ambulatory Surgery Centers are modern health care facilities focused on providing same day surgical care, including diagnostic and preventive procedures. ASC's have transformed outpatient experience by providing a more convenient alternative to hospital based outpatient procedures, with a strong track record of quality care and positive patient outcomes.

## WHY CHOOSE AN ASC?

### CALIBER OF CARE

All licensed healthcare facilities in the United States are highly regulated to ensure superior patient care and safety. ASC's follow the same stringent guidelines as hospitals. Studies show these high standards and attention to quality are associated with low infection rates and high patient satisfaction in ASCs.

### COST ADVANTAGE

ASC's strive to provide a superb surgical experience at a lower cost to patients.

### CONVENIENCE

Availability, Accessibility and Amenities

## ROBOTIC SURGERY

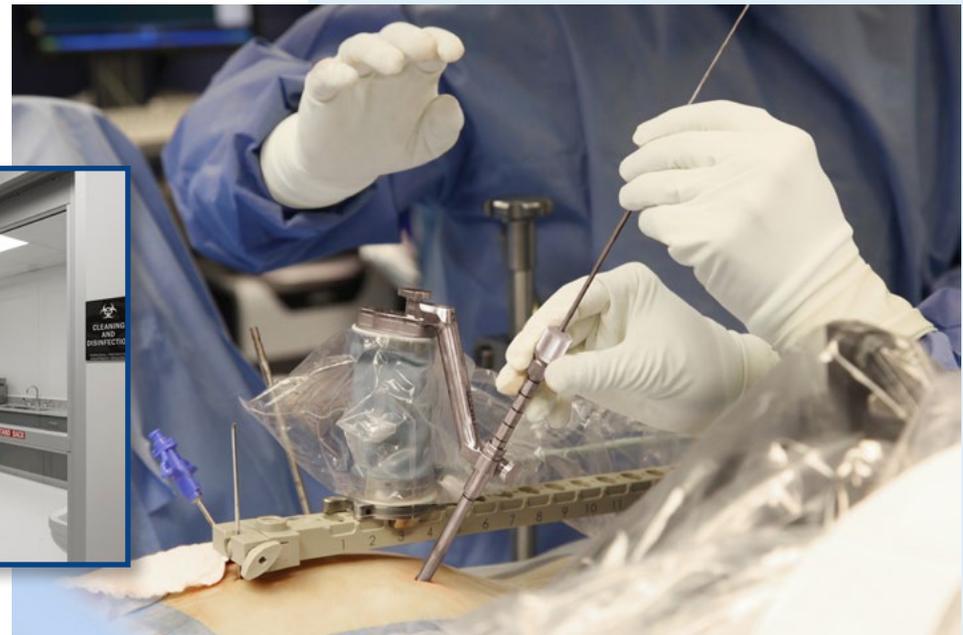

Mazor Robotics Renaissance Guidance System is the only mechanical guidance system for spine surgery with FDA clearance and has been used in thousands of spine procedures worldwide. It reduces the amount of x-ray or fluoroscopy dosage to the patient and improves implant accuracy.

Benefits can include:

- No Hospital Stay
- Less Blood Loss
- Less Pain
- Faster Recovery Time
- Smaller Incisions for minimal scarring

Mazor Robotics works well for a variety of spine procedures, such as: minimally invasive and percutaneous posterior spinal surgeries, hardware placement for spinal fusion surgeries, scoliosis and other spinal deformities, osteotomies and biopsies.

Speciality Surgical Center is a leader in innovative technology to enhance your recovery!

## OUR SERVICES

### ORTHOPEDIC SURGERY

- Arthroscopic knee surgery
- Arthroscopic shoulder surgery
- Total knee, hip, shoulder replacement surgery
- Ankle/Foot Surgery

### SPINE SURGERY

- Minimally Invasive Robotic Surgery
